Coding and Programming

I have a strong interest in coding and programming, which I have developed through various personal projects and academic coursework. One of my notable projects is a static website that mimics the YouTube interface, which I built using HTML and CSS.

Project Details:

Static YouTube Website

- **Objective:** The goal was to create a visually appealing and functional static website that resembles YouTube.
- **Technologies Used:** HTML and CSS.
- **Features:** The website includes a navigation bar, video thumbnails, and a footer. I focused on creating a clean and user-friendly interface.

- **Learning Outcomes:** Through this project, I enhanced my understanding of web development, particularly in structuring HTML and styling with CSS. I also gained experience in designing a layout that is visually consistent and easy to navigate.

Skills Developed:

- **HTML:** Proficient in structuring web content using HTML tags and elements.
- **CSS:** Skilled in styling web pages, creating layouts, and ensuring visual consistency.
- **Problem-Solving:** Developed problem-solving skills by troubleshooting and debugging code.
- **Attention to Detail:** Ensured that the website design was consistent and visually appealing.

Feel free to explore my project at YouTube Clone to see my work in action.
